## Cascade is Environmentally Friendly!!

After years where the earth has been used as a dumping ground for waste, industry today is expected to produce goods while having minimal impact on noise, air and water quality. IEP's Cascade Cleaning and Deburring System will enable you to process parts in a clean, safe and *cost effective* manner.

### **The Cascade System is a wet process; there is no dust to control:**

- ⚙ No special and costly air filtration systems are required
- ⚙ Our well designed "wet filtration system" provides for an efficient and cost effective way to collect the minimal solid waste generated
- ⚙ Solid wastes can be recycled or safely disposed of

### **Liquid compounds are environmentally safe:**

- ⚙ Use similar water soluble compounds as your machining center coolant
- ⚙ Nothing caustic; may be disposed of through normal water treatment procedures

### **Cascade meets noise pollution standards:**

- ⚙ Quiet operation of under 80 decibels
- ⚙ Reduce your employee's risk of hearing loss

### **Cascade is energy efficient:**

- ⚙ Cascade WILL reduce your company's energy costs
- ⚙ Less energy used means that we all benefit...more profit for your company and clean air, water, environment *and a brighter future for our families!*

***Can you afford to not look at IEP's Cascade System?*** Free prototyping can answer your questions.

Please contact us to begin the process. *"Applying solutions to your needs!"*
